

Messaging made simple.

Communication is easy with FastTrack.

LED displays continue to be an effective answer to getting important messages to employees or the public in a variety of environments. Enhance your company's communications with a high-impact messaging system featuring FastTrack from Inova Solutions.

FastTrack is an easy-to-use software that allows messages to easily be created and sent immediately, allowing instant, individual or company-wide communication. This is particularly useful when there are sudden changes, and is critical during emergency situations. FastTrack's clean user interface, allows you to spend time on getting your message delivered quickly to the appropriate audience.

Features

- ❑ **Easy to install and intuitive interface** allows the user to rapidly create and send vital messaging to the right audience and location.
- ❑ **Security feature** ensures no unauthorized messages are sent without the proper password.
- ❑ **Status icons** allows the user to quickly see if a message was successfully delivered to intended displays.
- ❑ **Perfect compliment** to OnTrack X-series Power over Ethernet LED displays, making it easy to create a simple messaging network with no need for additional AC power requirements.
