

Compliance to RoHS Directive (EU 2002/95/EC)

Updated February 13, 2007

As of July 1, 2006 the RoHS Directive calls for all electrical and electronic equipment being placed on the market in the European Union to be free of certain substances deemed hazardous. Inova Solutions, Inc. is currently compliant for the following products:

- Inova OnTime™ synchronized digital clocks
- Inova OnTrack™ M Series display boards

Inova is working with its supply chain partners to obtain the RoHS status of purchased parts and to find acceptable replacements for those not meeting the requirements for Inova OnTrack™ X Series displays.

All RoHS compliant products will be so marked.
